# My Library

Use the My Library feature to add documents and resources on the Service Trust Portal to your My Library page. This lets you access documents that are relevant to you in **a single place**. To add a document to your My Library, click the ellipsis (...) menu to the right of a document and then select **Save to library**. You can add multiple documents to your My Library by clicking the checkbox next to one or more documents, and then clicking **Save to library** at the top of the page.

Additionally, the notifications feature lets you configure your My Library so that an email message is sent to you whenever Microsoft updates a document that you've added to your My Library. To set up notifications, go to your My Library and click **Notification Settings**. You can choose the frequency of notifications and specify an email address in your organization to send notifications to. Email notifications include links to the documents that have been updated and a brief description of the update.

If a document is part of a series, you will be subscribed to the series and will receive notifications when there is an update to that series. You can view the

**Q593:** Azure Site Recovery provides \_\_\_\_\_ for virtual machines.

- a) fault tolerance
- b) disaster recovery
- c) elasticity
- d) high availability

**Q594:** Azure Virtual Machines offer less control over the computing environment than the other compute offerings.

Yes

No

**Q595:** This question requires that you evaluate the underlined text to determine if it is correct.

When you are implementing a software as a service (SaaS) solution, you are responsible for configuring high availability.

Instructions: Review the underlined text. If it makes the statement correct, select “No change is needed”. If the statement is incorrect, select the answer choice that makes the statement correct.

- a) No change is needed.
- b) defining scalability rules
- c) installing the SaaS solution
- d) configuring the SaaS solution

**Q596:** This question requires that you evaluate the underlined text to determine if it is correct.

A support plan solution that gives you best practice information, health status and notifications, and 24/7 access to billing information at the lowest possible cost is a Standard support plan.

Instructions: Review the underlined text. If it makes the statement correct, select “No change is needed”. If the statement is incorrect, select the answer choice that makes the statement correct.

- a) Developer
- b) No change is needed
- c) Basic
- d) Premier

**Q597:** You plan to use Azure to host two apps named App1 and App2. The apps must meet the following requirements:

- You must be able to modify the code of App1.
- Administrative effort to manage the operating system of App1 must be minimized.
- App2 must run interactively with the operating system of the server.

Which type of cloud service should you use for each app?

To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

APP1
a) Infrastructure as a Service (IaaS)
b) Platform as a Service (PaaS)
c) Software as a Service (SaaS)

APP2
a) Infrastructure as a Service (IaaS)
b) Platform as a Service (PaaS)
c) Software as a Service (SaaS)

**Q598:** To answer, drag the appropriate benefit from the column on the left to its description on the right. Each benefit may be used once, more than once, or not at all.

**Q599:** This question requires that you evaluate the underlined text to determine if it is correct.

Azure policies provide a common platform for deploying objects to a cloud infrastructure and for implementing consistency across the Azure environment.

Instructions: Review the underlined text. If it makes the statement correct, select “No change is needed”. If the statement is incorrect, select the answer choice that makes the statement correct.

- a) No change is needed
- b) Resource groups
- c) Azure Resource Manager
- d) Management groups

**Q600:** This question requires that you evaluate the underlined text to determine if it is correct.

An Azure region contains one or more data centers that are connected by using a low-latency network.

Instructions: Review the underlined text. If it makes the statement correct, select “No change is needed”. If the statement is incorrect, select the answer choice that makes the statement correct.

- a) No change is needed
- b) Is found in each country where Microsoft has a subsidiary office
- c) Can be found in every country in Europe and the Americas only
- d) Contains one or more data centers that are connect by using a high-latency network
